

Green Crafts

A new after-school club came into being at the beginning of December. It consists of pupils and teachers who have an interest in making 'green-friendly' crafts with the added agenda of trying to raise some money for deserving charities when possible.

The club made sock-snowmen during December and sold them at the Winter Fair. Along with the sale of our homegrown herb bouquets, they raised the sum of €58.20 for the Society of St. Vincent de Paul. Thank you to all pupils and parents involved in making, selling and supporting this activity and cause.

Our school have joined ReCreate; a centre which sources unwanted materials from businesses (saving them from the bins and in this way helping the environment) and supplies these materials in their warehouse for reuse by schools and other organisations. The ReCreate warehouse is filled with all types of fantastic arts materials such as paper, wool, plastics, fabric, tubing, foam and many other unusual items which can be used for an endless number of creative projects.
